

NO OBLIGATION · 2 WORKING DAYS · HONEST ASSESSMENT

Free Project Feasibility Review

A no-cost initial review before you **cut back the design, turn down the job, or quote it with no real margin.**

STEP 1 — WHEN TO SUBMIT

When to Send Us a Project

- ✓ The design is difficult to price or produce locally
- ✓ The local quote leaves little or no workable margin
- ✓ The product is hard to source from local suppliers
- ✓ The client wants finishes or elements beyond local capability
- ✓ You are unsure whether offshore production makes sense

STEP 2 — WHAT TO SEND

What to Include

- Plans, elevations & joinery drawings
- Finish schedule & hardware requirements
- Target budget & required delivery timeframe
- Photos or renders if available
- Any “must not fail” dimensions, finishes or details

You don't need a perfect package. Send what you have — we'll tell you what's missing.

STEP 3 — WHAT PROLINK PROVIDES WITHIN 2 WORKING DAYS

What You Receive

- Whether the project appears suitable for qualified offshore manufacturing
- Where the likely cost range may sit
- Key risks we can already identify
- Whether it is worth exploring further, or should stay local
- What is still required for a reliable quotation

SCOPE — WHAT THIS REVIEW IS NOT

Important Boundaries

- ✗ Not a final quotation
- ✗ Not a production commitment
- ✗ Not a guarantee of final cost or delivery time
- ✗ Not an obligation to proceed

This is an initial feasibility view based on the information provided. No cost. No pressure. No obligation on either side.

SEND THE PROJECT PACKAGE TO

hello@prolinksolution.com.au

or call Ben Li on 0485 838 596

If offshore doesn't make sense,
we'll tell you to **keep the job local.**
